

Free NAPLAN practice you can safely share with families

Brightstar is a free learning platform for Australian primary students, built by a parent who wanted practice material that wasn't paywalled or asking families to hand over their details.

100% free

No signup

No ads

No child accounts

Curriculum v9.0

Practice in all four domains

2,000+ curriculum-aligned questions across reading, writing, conventions of language and numeracy, with an explanation on every wrong answer.

AI writing feedback

Students submit a narrative or persuasive piece and receive a score against all ten official ACARA criteria, with specific praise and one improvement.

Printable worksheets

An unlimited generator producing maths and English worksheets with answer keys — useful for homework packs or screen-free practice.

Timed practice tests

Full practice tests for Year 3 and Year 5 so students can experience the format and pacing before the real thing.

Why schools have shared it

- ✓ Genuinely free — there is no paid tier and nothing to upgrade to
- ✓ Nothing to set up: no accounts, licences or logins to manage
- ✓ Works on any device with a browser, including older tablets
- ✓ Reading questions teach the skill behind each answer, not just right or wrong
- ✓ Content reflects the current 2023 proficiency levels, not the retired band scale

Safe to send home

- **No account, no name, no email**, and we never ask children for personal details
- **Progress saves on the family's own device.** Nothing about a child is stored on our servers; a privacy-minimised daily AI counter is kept by our host and deleted within 48 hours
- **No advertising**, and no analytics or third-party tracking on the pages children use
- **Nothing is sold, and nothing is shared for anyone else's purposes.** Two features send data to our providers when a parent asks for them — AI writing feedback sends the writing, and the optional parent report sends practice scores and topic names, never the writing
- **The AI marks a child's writing; it never writes for them.** There is no open chat

"I couldn't find a free tool that actually gave feedback on my daughter's writing, so I built one. It stays free because it costs me a few dollars a month to run and there's nothing to sell."

— Naveen, parent in Sydney and creator of Brightstar

Free for every Australian family
